

REPS WITH FRIENDS

JOIN THE BATTLE. WIN THE DAY.

MASTER PRODUCT SOURCE OF TRUTH

Definitive consolidated product blueprint - consumer app, team play, seasons, stakes, chat integrations, corporate mode, exercises, power-ups, social systems and roadmap

Version 2026-09-02 | Living specification | Supersedes fragmented earlier summaries and prompts

Source-of-truth rule: where earlier ideas conflict with later explicit decisions, the latest explicit product decision governs. Older ideas are preserved as Legacy, Future/Experimental or Unclear rather than silently discarded.

Contents

1. **Overview** - Product definition, users, core journey, modes, daily layer, seasons, stakes, brand.
2. **Screens** - Complete inventory of screens and designed states, including purpose and navigation.
3. **Functions and features** - Every functional area and how it works.
4. **User flows** - End-to-end flows for creation, battles, seasons, stakes, teams, corporate and chat.
5. **Gaps** - Missing or unclear requirements, edge cases, permissions and product rules.
6. **Open questions** - Decisions still required from the product owner.
7. **Canonical decisions** - Stable decisions that should not be re-opened casually.

1. Overview

1.1 What Reps With Friends is

Reps With Friends is a real-time multiplayer fitness game built around existing relationships. It is deliberately not positioned as another workout tracker. Exercise is the game mechanic; the underlying product is social accountability, competition, banter, connection and repeated human interaction.

A user joins a group of friends, colleagues, family members or teammates. The group agrees which days of the week they will play. On an active day, each player receives a daily adjusted rep target - currently 200 competition reps as the working baseline - and races the other eligible players or teams to reach that target. Every rep updates the battle in real time.

Core loop: Rep -> Daily Battle -> Daily Win -> Season -> Stake / Reward -> Long-term identity and progression.

The first player or team to satisfy the day's win condition earns the Daily Win. The battle does not become meaningless after somebody wins: every player who subsequently completes their own target still banks a completed day, preserves their streak, earns participation credit, and contributes toward relevant team and long-term metrics.

Daily Wins feed into Seasons. Stakes resolve at the season level, not on individual days. Weekly is the default season length; Monthly and six-month/annual Major Seasons are longer-term options.

1.2 Who it is for

Friends: The primary consumer use case: school friends, old mates, siblings, gym friends, geographically dispersed groups, existing WhatsApp/Messenger groups, and groups deliberately bringing an old friend or someone who could benefit from regular social engagement back into the fold.

Beginners / less-active users: The product must not become a game that only the strongest athlete can win. Handicaps, accessible exercise choices, lower physical barriers, guided videos and completion/streak rewards make mixed-ability participation viable.

Regular gym users / athletes: Experienced groups can enable advanced movements, weighted exercises, custom exercises, stronger rep-conversion rules, verified leaderboards and higher-intensity competition.

Small teams: Friends can divide into flexible teams with a minimum of two people per team: 2v2, 3v2, 3v3, three teams of two and other sensible combinations.

Companies: Corporate Mode applies the Team Mode engine to departments, branches, regions and companies. Corporate Mode changes governance, tone, privacy and administration but should not change the basic daily player experience.

Creators / communities - Future: Influencers, trainers or public figures could run larger public challenges, sponsored seasons or creator leagues.

Defining product principle: Complexity belongs in setup, never in daily use.

Whether the user is playing Individual Mode, Team Mode or Corporate Mode, daily usage should feel almost identical: open app or connected chat, see today's target, see who is ahead, log reps, watch the battle react, use power-ups / react / encourage / taunt, finish target, see result. Modes primarily change who the player's result is compared against, not how basic exercise logging works.

1.3 The dual-surface product

A. The Hero App

The standalone mobile application is the command centre and source of truth. It owns accounts, profiles, groups, battles, exercise rules, handicap values, team structures, seasons, stakes, power-up inventory, logs, leaderboards, streaks, achievements, history, analytics, subscriptions, proof/integrity data and corporate administration.

B. The Chat Layer

Reps With Friends should also live where friend groups already spend their time. Target integrations discussed include WhatsApp, Slack, Messenger, Discord, Microsoft Teams and potentially iMessage or other messaging surfaces later.

- Rep and milestone updates
- Lead changes
- Power-up activations
- Final-hour warnings
- Winner and season announcements
- Invitations and deep links
- Status requests
- Challenges and reactions
- Direct rep logging where platform APIs permit it
- Power-up activation where technically feasible

The hero app remains authoritative. Chat clients never create a separate game state. This duality is a core retention and distribution strategy: the product can live inside communication habits that already exist instead of requiring every interaction to begin inside the standalone app.

1.4 Competition modes

Mode 1 - Individual: Every player competes against every other player. Daily target is personally adjusted by handicap. The first eligible player to target earns the Daily Win.

Mode 2 - Team: Players are allocated to two or more sides, minimum two people per team. Individual activity feeds a team result. Exact normalisation for uneven teams remains unresolved.

Mode 3 - Corporate: Same basic competition engine as Team Mode, but company admin creates/manages structure; teams may be departments, regions or companies; safer communication defaults apply; employer-data visibility requires specific privacy rules; charity/community stakes are preferred over cash gambling.

1.5 The Daily Layer

Working base target: 200 adjusted reps. Each player has a handicap multiplier. Current direction: a fitter player receives a multiplier that makes each physical rep contribute less; a less-fit player receives a multiplier that makes each physical rep contribute more. The objective is not equal physical output; it is similar competitive effort. The exact handicap formula remains open.

Current latest Daily Win rule: the first eligible participant to reach the adjusted daily target wins the day. This supersedes earlier concepts where the winner was simply the highest score when the day ended.

Everyone who reaches target still completes/banks the day even if someone else already won. Completion affects streak, participation, personal history, potentially team contribution, achievements and analytics.

1.6 Seasons

Weekly Season - default: Recommended because it creates rapid resets, strong comeback possibility, a clear narrative and a habitual rhythm.

Monthly Season - optional: Longer competition for established groups. Increased narrative depth but greater risk of a hopeless losing run.

Major Season - future / optional: Six-month or annual overlay. Could eventually run concurrently with Weekly or Monthly seasons. Architecturally desirable but not yet confirmed for V1 UI.

1.7 Stakes

Latest product decision: nothing financial or material settles on an individual day. The season ends, then the agreed stake resolves.

Dinner: Loser buys/pays for an agreed meal.

Dare: Forfeit is declared and accepted before the season. Examples: ridiculous clothing, a predetermined social post, funny costume workout, or another safe agreed task.

Deliverable: Non-food favour such as washing a car, performing an agreed task, coffee run, cooking or another practical favour.

Charity Pot: Current preferred launch money mechanic. Players contribute to a season pot; the winner does not receive cash and instead chooses which eligible charity receives the pot. Reps With Friends may take a small disclosed platform/operational fee. Still requires charity/fundraising/payment legal review.

Cash wagering - Deferred: Player-to-player cash betting is explicitly not V1. It remains a future bolt-on requiring licensing analysis, KYC, age checks, geofencing, payments, payouts, wallet/reserve design, jurisdiction-by-jurisdiction rules and store review.

1.8 Product personality and visual direction

The product should feel premium, bold, social, competitive, cheeky, playful without becoming childish, extremely easy to scan, energetic, polished and habit-forming. It should not feel like generic gym software, corporate SaaS, crypto, casino UI, fantasy gaming, bodybuilding software or cartoon gamification.

Winner screens may borrow the dopamine intensity of jackpot/poker-machine presentation without turning the overall product into a casino aesthetic.

Core slogans: Join the Battle. Win the Day.

Latest UI direction: near-black background, strong yellow/gold primary accent, occasional purple secondary effects, glowing highlights, thick rounded cards, bold display typography, large hero numerals and collectible/loot-style presentation. Current nav direction: Battle / Feed / central Log / Power-Ups / Profile.

Visual conflict to preserve: earlier project work used Dark #282828, Yellow #fbf16d and Cream #fef9f4 with a cream-led interface; an older artifact used neon lime and lavender. Current recommendation is to treat the latest black/gold family as leading while retaining cream as a possible secondary/light-surface colour until the final design system is explicitly locked.

2. Screens

The inventory below captures screens, overlays and meaningful designed states mentioned or implied across the project. Many states can share reusable components and do not imply 299 bespoke visual designs.

CORE	CONDITIONAL	FUTURE	EXPERIMENTAL	MISSING	UNCLEAR
------	-------------	--------	--------------	---------	---------

2.1 Entry, authentication and account

#	Screen	Status	Purpose / key elements / links
1	Splash	CORE	Brand/app load; logo and brand animation -> Welcome/Home.
2	Welcome / Start	CORE	Explain product in seconds; Join the Battle / Win the Day, Create/Join -> Onboarding/Login.
3	Product explainer 1	CORE	Explain daily battle: target, first-to-target, friends -> Next.
4	Product explainer 2	CORE	Explain seasons: Daily Wins -> season -> Next.

42	Player handicap review	UNCLEAR	Review player multipliers -> Exercises.
43	Exercise mode	CORE	Bodyweight / Mixed / Gym -> Library.
44	Allowed exercises	CORE	Selectable library -> Custom.
45	Custom exercises permission	CORE	Toggle/admin approval -> Season.
46	Season length	CORE	Weekly / Monthly / Major; weekly default -> Stake.
47	Stake type	CORE	None / Dinner / Dare / Deliverable / Charity -> flow.
48	Dinner stake setup	CONDITIONAL	Description and possible spend cap -> Review.
49	Dare setup	CONDITIONAL	Lock dare before season; agreement -> Review.
50	Deliverable setup	CONDITIONAL	Define favour/due rule -> Review.
51	Charity Pot intro	CONDITIONAL	Explain pot, contribution and fee -> Charity settings.
52	Charity contribution setup	CONDITIONAL	Set per-person amount -> Payment.
53	Charity eligibility/rules	MISSING	Approved charities/list/nominations -> Review.
54	Power-up settings	CORE	Enable/disable allowed cards -> Notifications.
55	Group communication style	CORE	Cheeky/neutral/corporate-safe -> Integration.

56	Chat integration choice	FUTURE	Connect WhatsApp/Slack/etc. -> platform setup.
57	Battle clock	CORE	Shared/adaptive timezone; timezone/reset -> Review.
58	Group setup review	CORE	Confirm all setup -> Create.
59	Group created	CORE	Success, invite link, QR -> Lobby.

2.4 Join flows

#	Screen	Status	Purpose / key elements / links
60	Enter invite code	CORE	Join manually -> Group Preview.
61	Invite deep-link preview	CORE	Show members/days/mode before join -> Join.
62	Group rules acceptance	CORE	Explicit agreement to schedule/target/handicap -> Stake.
63	Stake acceptance	CONDITIONAL	Agree stake before season -> Join.
64	Charity contribution	CONDITIONAL	Pay contribution; amount/fee -> Join.
65	Join successful	CORE	Confirm membership -> Lobby.
66	Group full	CORE	Capacity error -> Back.
67	Invite expired	CORE	Request new invite -> Share/admin.
68	Removed/banned from group	MISSING	Explain access, reason/support -> Home.

2.5 Team setup

#	Screen	Status	Purpose / key elements / links
69	Team creation	CORE	Create 2+ teams; names/colors -> Assign.
70	Assign members	CORE	Form teams from roster -> Balance.
71	Team balance preview	UNCLEAR	Show team sizes/handicaps -> Rules.
72	Team scoring rule	UNCLEAR	Pooled/average/minimum quota -> Review.
73	Minimum contribution	UNCLEAR	Prevent freeloading -> Review.
74	Team identity	CORE	Name/icon/color -> Complete.
75	Team roster	CORE	Players/status -> Battle.
76	Team contribution detail	CORE	See member progress -> player details.

2.6 Corporate setup and admin

#	Screen	Status	Purpose / key elements / links
77	Create organisation	FUTURE	Establish company -> Admin.
78	Corporate admin home	FUTURE	Manage leagues, teams and users -> modules.
79	Import employees	FUTURE	CSV/link/domain -> Teams.
80	Department setup	FUTURE	Create internal teams -> Assign.
81	Internal league setup	FUTURE	Department versus department -> Schedule.
82	Company-v-company setup	FUTURE	Cross-company invite -> League.
83	Corporate safe-mode settings	CORE	Control tone; taunts/shaming off ->

			Save.
84	Corporate charity setup	FUTURE	Organisation charity season/company match -> Payment.
85	Corporate privacy settings	MISSING	Control employee/admin data visibility -> Save.
86	Corporate branding	FUTURE	Logo/colors -> Preview.
87	Corporate reporting dashboard	FUTURE	Participation/completion reporting -> Export.
88	Corporate team leaderboard	FUTURE	Department results -> Team.
89	Company league leaderboard	FUTURE	Cross-company standings -> detail.
90	Admin moderation queue	FUTURE	Issues/reports -> Resolve.

2.7 Daily Battle

#	Screen	Status	Purpose / key elements / links
91	Battle Home	CORE	Main daily experience: target, progress, timer, leaderboard, recent activity -> Log/Feed/Power-Ups.
92	Full leaderboard	CORE	Detailed rank: players/teams, target status -> Player.
93	Crew activity	CORE	Avatars/progress/active members -> Feed.
94	Player battle detail	CORE	Competitor progress, streak, sets -> Taunt/challenge.
95	Team battle view	CORE	Team comparison plus personal target -> Team details.
96	Corporate daily battle	CORE	Same daily UX with department comparison -> leaderboard.
97	Active-now overlay	FUTURE	Show current workout presence -> Join live.
98	Close-call state	CORE	Intensify tight finish; leader gap/time -> Share.
99	Danger Zone state	CORE	Final-period urgency -> Log.
100	Battle paused / Time Freeze	CORE	Frozen timer/effect -> Battle.
101	Rest day	CORE	Confirm safe off-day and next active day -> Season.
102	Battle complete but season live	CORE	Winner and tomorrow transition -> recap.
103	Server reconnecting	MISSING	Show cached status and reconnect progress -> Battle.
104	Offline battle	CORE	Allow queued logging; offline badge -> Logs.
105	Sync conflict	MISSING	Resolve duplicate/conflicting logs -> Confirm.

2.8 Rep logging

#	Screen	Status	Purpose / key elements / links
106	Quick Log	CORE	Fastest input; favourites/presets -> Success.
107	Choose Exercise	CORE	Search/categories of allowed list -> Exercise.
108	Exercise detail	CORE	Demo, cues, weighting -> Log.
109	Numeric rep entry	CORE	Keypad/presets -> Confirm.

110	Timed movement entry	CORE	Plank/wall sit timer -> Confirm.
111	Batch logging	CORE	Multiple set rows -> Confirm.
112	Recent exercises	CORE	Reuse recent movements -> Log.
113	Favourite exercises	CORE	Fast access -> Log.
114	Rest timer	FUTURE	Inter-set timer presets -> Battle.
115	Log confirmation	CORE	Prevent error; exercise/ reps/score -> Submit.
116	Log success	CORE	Reward action, show remaining reps -> Battle.
117	Big-set celebration	FUTURE	Reward major set -> Battle.
118	Undo/Edit log	CORE	Fix mistake -> Feed.
119	Duplicate log warning	MISSING	Prevent accidental duplicate -> Confirm.
120	Offline log queue	CORE	Manage pending entries -> Sync.
121	Voice logging	FUTURE	Hands-free microphone -> confirmation.
122	Widget setup	FUTURE	Lock/home shortcuts -> OS widget.
123	Watch setup	FUTURE	Apple Watch/Wear OS -> device.
124	Motion detection	EXPERIMENTAL	Auto-count reps -> calibration.
125	Location prompt	EXPERIMENTAL	Gym-aware prompt -> Log.

2.9 Exercise system

#	Screen	Status	Purpose / key elements / links
126	Exercise Library	CORE	Browse stock list by category/filter.
127	Exercise search/filter	CORE	Find by equipment/difficulty.
128	Exercise video	CORE	Consistent licensed demo loop.
129	Modification chooser	CORE	Beginner/advanced variations.
130	Gym Mode library	FUTURE	Weighted movements and equipment.
131	Weighted exercise logger	FUTURE	Load + reps + optional RPE.
132	Custom Exercise create	FUTURE	Name/category/conversion.
133	Custom Exercise video	FUTURE	Upload demo.
134	Custom Exercise approval	CONDITIONAL	Admin approve/reject.
135	Community exercise library	FUTURE	Import user-created movements; moderation required.
136	Exercise Combo library	FUTURE	Predefined sequences.
137	Create Combo	FUTURE	Sequence and bonus.

2.10 Power-Ups

#	Screen	Status	Purpose / key elements / links
138	Power-Up Inventory	CORE	View hidden owned cards.
139	Card detail	CORE	Rules, limits and best-use tip.
140	Target selection	CORE	Choose eligible player/team.
141	Activation confirm	CORE	Prevent accidental use.
142	Lightning activation	CORE	Full-screen moment and 10-minute timer.
143	Rep Steal result	CORE	Show gain and target.
144	Group Shield active	CORE	Show protection state.

145	Time Freeze active	CORE	Frozen/extended countdown.
146	Loot reward	FUTURE	Award card.
147	Daily drop	FUTURE	Retention reward.
148	Combo Boost flow	FUTURE	Run combo.
149	Double Down confirm	FUTURE	Accept 2x target/reward.
150	Assist Boost	FUTURE	Support teammate.
151	Surprise Bomb target	FUTURE	Assign short challenge.
152	Surprise Bomb timer	FUTURE	10-minute countdown.
153	Rescue Rope	FUTURE	Reactivate teammate.
154	Shield Bash	FUTURE	Counter active shield.
155	Power-Up store	FUTURE	IAP/earnables.
156	Collection/Rarity	FUTURE	Collectible layer.

2.11 Proof and integrity

#	Screen	Status	Purpose / key elements / links
157	Proof Check hub	FUTURE	Integrity/proof status.
158	Random proof request	FUTURE	Spot-check prompt.
159	Proof recording	FUTURE	Short video evidence.
160	Proof review	FUTURE	User confirms upload.
161	Proof passed	FUTURE	Trust reward.
162	Proof failed/rejected	MISSING	Handle failure and dispute.
163	Flag rep	FUTURE	Peer challenge.
164	Flag reason	FUTURE	Explain concern.
165	Flag status	FUTURE	Review state.
166	Trust level	FUTURE	Credibility score.
167	Admin integrity review	FUTURE	Review flags/proof.
168	Verified leaderboard	FUTURE	Proof-required ranking.
169	Hardcore/Verified mode	FUTURE	Higher-proof competition.
170	Corporate private integrity	FUTURE	No public shaming.

2.12 Winners, recap and streaks

#	Screen	Status	Purpose / key elements / links
171	You Won The Day	CORE	Daily victory dopamine moment.
172	Other Player Won	CORE	Keep non-winner engaged.
173	Target Completed - not winner	CORE	Celebrate banking day/streak.
174	Failed Day	CORE	Show consequence and comeback.
175	Battle Recap	CORE	Final standings and key moments.
176	MVP Moment	FUTURE	Recognise PR or standout contribution.
177	Streak Celebration	CORE	Reward completion consistency.
178	Streak At Risk	CORE	Loss-aversion prompt.
179	Streak Broken	CORE	Transition to comeback.
180	Share Daily Win	CORE	Branded social output.
181	Share Recap	CORE	Group result card.
182	Close Call share card	FUTURE	Viral battle moment.

183	Personal record celebration	CORE	Reward milestone.
-----	-----------------------------	------	-------------------

2.13 Seasons and stakes

#	Screen	Status	Purpose / key elements / links
184	Season Hub	CORE	Current standings and stake.
185	Weekly Standings	CORE	Daily Win totals.
186	Monthly Standings	CONDITIONAL	Longer season.
187	Major Season Standings	FUTURE	Six-month/annual.
188	Season Calendar	CORE	Day-by-day results.
189	Season Stake	CORE	Show agreed consequence.
190	Season Final Day	CORE	Heighten stakes.
191	Season Winner	CORE	Major celebration.
192	Season Recap	CORE	Wins/completions/stats.
193	Dinner obligation	CONDITIONAL	Record loser obligation.
194	Dare obligation	CONDITIONAL	Show agreed dare.
195	Deliverable obligation	CONDITIONAL	Track favour.
196	Forfeit proof upload	FUTURE	Verify dare/deliverable.
197	Forfeit completed	FUTURE	Close season obligation.
198	Charity Pot status	CONDITIONAL	Contributions and pot.
199	Charity winner chooser	CONDITIONAL	Winner selects charity.
200	Charity directory	MISSING	Eligible charities.
201	Donation confirmation	CONDITIONAL	Amount/fee/receipt.
202	Charity impact share card	FUTURE	Share outcome.
203	Past Seasons	CORE	History.
204	New Season setup	CORE	Restart/amend rules.

2.14 Feed, chat and social

#	Screen	Status	Purpose / key elements / links
205	Feed	CORE	Social activity stream.
206	Feed event detail	FUTURE	Deep link event.
207	Reactions	CORE	One-tap emoji response.
208	Group Chat	FUTURE	Conversation and pinned challenge context.
209	Taunt chooser	FUTURE	Preset banter.
210	Write custom taunt	FUTURE	Player expression.
211	Challenge player	FUTURE	Mini race/side challenge.
212	Challenge detail	FUTURE	Status/result.
213	Bring Back a Mate	FUTURE	Reactivate dormant friend.
214	Invite someone who needs a crew	FUTURE	Connection/social support.
215	Reunion challenge	FUTURE	Old group activation.
216	Block/report user	MISSING	Safety.
217	Report social content	MISSING	Moderation.

2.15 UGC and video

#	Screen	Status	Purpose / key elements / links
218	Create Content	FUTURE	Choose content format.
219	Rep Cam	FUTURE	Record a set.
220	Hype Clip	FUTURE	Short taunt/encouragement.
221	Taunt Mode	FUTURE	Video plus group tag.
222	Upload External Clip	FUTURE	Caught-repping upload.
223	Tag/consent request	MISSING	Recorded-person approval.
224	Clip editor	FUTURE	Trim/overlay.
225	Branded overlay preview	FUTURE	Rep/time/power-up overlay.
226	Clutch Capture	FUTURE	End-of-day montage.
227	Highlight Reel	FUTURE	Auto recap.
228	Video privacy	MISSING	Group/public settings.
229	Video report/moderation	MISSING	Safety.

2.16 Messaging-platform integrations

#	Screen	Status	Purpose / key elements / links
230	Integrations Hub	FUTURE	Manage connected messaging platforms.
231	Connect WhatsApp	FUTURE	Connect existing group.
232	Connect Slack	FUTURE	Workspace/channel OAuth.
233	Connect Messenger	FUTURE	Group/channel setup.
234	Connect Discord	FUTURE	Server/channel.
235	Connect Teams	FUTURE	Organisation/team.
236	Linked Chats	FUTURE	View connections.
237	Chat Notification Settings	FUTURE	Event frequency.
238	Chat Command Help	FUTURE	/reps, status, etc.
239	Chat-First Group Created	FUTURE	Confirmation.
240	Chat Opt-In Landing	FUTURE	Join with low friction.
241	Temporary Profile	UNCLEAR	Lightweight identity.
242	Claim Chat Profile	UNCLEAR	Convert to full account.
243	Disconnect Platform	FUTURE	Remove integration.
244	Integration Error	MISSING	API/token failure state.

2.17 Analytics and progression

#	Screen	Status	Purpose / key elements / links
245	Profile Dashboard	CORE	Identity and progress.
246	Personal Stats	CORE	Reps/wins/completion.
247	Streak History	CORE	Consistency.

249	Exercise Breakdown	FUTURE	Movement diversity.
250	Pace Predictor	FUTURE	Expected finish.
251	Peak Activity	FUTURE	Best times.
252	Social Impact	FUTURE	Influence on others.
253	Group Chemistry	EXPERIMENTAL	Engagement score.

254	Social Graph	EXPERIMENTAL	Who motivates whom.
255	City Rankings	FUTURE	Geographic competition.
256	Global Rankings	FUTURE	Wider competition.
257	Achievements	FUTURE	Badges.
258	Rank/Prestige	EXPERIMENTAL	Long-term progression.
259	Lifetime Impact	EXPERIMENTAL	Health estimate; high-risk claims.
260	Group Analytics	FUTURE	Group performance.
261	Corporate Analytics	FUTURE	Engagement reporting.

2.18 Subscription, commerce and physical kits

#	Screen	Status	Purpose / key elements / links
262	Paywall	FUTURE	Free/Pro monetisation.
263	Plan Comparison	FUTURE	Entitlements.
264	Subscribe	FUTURE	RevenueCat/IAP.
265	Restore Purchase	MISSING	Store requirement.
266	Billing	MISSING	Manage subscription.
267	Corporate Enquiry	FUTURE	B2B lead.
268	Power-Up Store	FUTURE	IAP.
269	Cosmetic Store	EXPERIMENTAL	Skins.
270	Reps Kits Store	FUTURE	Physical product.
271	Starter Kit	FUTURE	Kit detail.
272	Pro Kit	FUTURE	Kit detail.
273	Team Kit	FUTURE	Corporate bundle.
274	Redeem Kit Code	FUTURE	Physical-to-digital unlock.
275	Redemption Success	FUTURE	Unlock items.
276	Merch	FUTURE	Apparel/brand products.

2.19 Settings, safety, legal and support

#	Screen	Status	Purpose / key elements / links
277	Settings	CORE	Master settings.
278	Edit Profile	CORE	Personal information.
279	Notifications	CORE	Push preferences.
280	Quiet Hours	CORE	Delivery window.
281	Tone and Banter	CORE	Cheeky/neutral/corporate-safe.
282	Privacy	MISSING	Visibility controls.
283	Security	MISSING	Sessions/password.
284	Connected Apps	FUTURE	Messaging/app links.
285	Health Integrations	FUTURE	Apple Health etc.
286	Wearables	FUTURE	Watch devices.
287	Blocked Users	MISSING	Safety.
288	Data Export	MISSING	Privacy compliance.
289	Delete Account	MISSING	Account rights.
290	Terms	CORE	Legal.
291	Privacy Policy	CORE	Privacy.
292	Community Rules	MISSING	Behaviour standards.

293	Stakes Terms	CONDITIONAL	Season stakes.
294	Charity Terms	MISSING	Donation/payment rules.
295	Support	CORE	Help.
296	FAQ	FUTURE	Self-help.

298	About	CORE	Company/app.
299	App Version / Diagnostics	MISSING	Support/debug.

2.20 Critical system states that still need designed handling

- No internet
- Slow connection
- Realtime connection lost
- Server maintenance
- Invalid token/session expired
- User removed from group
- Group archived
- Group owner left
- No active season
- No active battle
- Player joined mid-season
- Player leaves mid-season
- Player changes timezone
- DST transition
- Handicap updated mid-season
- Exercise removed after logs exist
- Target changed after season begins
- Custom exercise awaiting approval
- Power-up expired
- Power-up target invalid
- Power-up conflicts
- Charity payment failed
- Partial charity contributions
- User refuses stake
- Tie at season end
- Team member becomes inactive
- Team size becomes invalid
- Notification permission denied
- Camera permission denied
- Microphone permission denied
- Photo-library permission denied
- Proof video upload failure
- Deep link expired
- Messaging integration token revoked
- Subscription entitlement unavailable
- Subscription expired
- Chat action received from unlinked account
- Deleted rep changes winner after result publication
- Disputed result
- Moderation appeal

3. Functions and features

3.1 Core competition

Function	How it works	Screens / surfaces
Active Days	Group chooses agreed playing days; no penalty on rest days.	39, 29, 101
Daily Target	Working 200 adjusted reps; configurable.	40, 91
First-to-Target Daily Win	First eligible player to adjusted target earns the Daily Win.	91, 171
Complete / Bank Day	Later finishers still preserve completion and streak.	173, 177
Daily Win Currency	Daily Wins accumulate into season standings.	184-188
Weekly Season	Default short competitive cycle.	46, 184-185
Monthly Season	Longer opt-in cycle.	46, 186
Major Season	Six-month/annual prestige overlay.	187
Individual Mode	Every player competes independently.	36, 91
Team Mode	Small teams compete while each player retains a personal target.	36, 69-76, 95
Corporate Mode	Team engine with company admin/governance.	77-90
Flexible teams	At least 2 players per team; uneven team sizes conceptually allowed.	69-73
Leaderboard	Live ranking and standings.	91-92
Close-call detection	Detect tight finishes and trigger urgency.	98
Battle recap	End-of-day standings and key moments.	175
Season recap	Daily Win and stake summary.	192

3.2 Handicap and fairness

Function	How it works	Screens / surfaces
Handicap Multiplier	Adjusts effective rep value according to fitness capability.	18-20, 41-42
Baseline Calibration	Establishes initial capability.	18-20
Recalibration	Periodically changes multiplier based on performance.	MISSING
Bounds	Prevents extreme handicap abuse.	MISSING
Sandbagging detection	Flags deliberate underperformance or implausible patterns.	157-170 FUTURE
Mixed-ability competition	Keeps fitter and less-fit friends meaningfully competitive.	Battle/leaderboard
Team fairness	Normalises different ability profiles.	71-73

Conflict to preserve: earlier concepts sometimes changed player targets rather than rep value; latest direction specifically says the handicap multiplier changes what reps are worth.

3.3 Exercise system

Current stock library discussed: Push-ups, Squats, Burpees, Lunges, Mountain Climbers, Plank Jacks/dynamic plank, Jump Rope, Dips, High Knees, Bicycle Crunches, Jumping Jacks and Wall Sits. The product owner later asked for approximately 15-20 stock exercises, so additional defaults remain to be locked.

- Push-ups: wide, diamond, incline, decline
- Squats: jump, pistol, Bulgarian split

- Burpees: half, box-jump
- Lunges: reverse, jumping, walking
- Mountain Climbers: cross-body, slow tempo
- Plank: plank jacks, up-downs, plank-to-downward-dog
- Skipping: double unders, single-leg
- Dips: straight-leg, bent-knee
- High Knees: quick feet, butt kickers
- Core: bicycle crunches, reverse crunches, leg raises
- Jumping Jacks: star jumps, seal jacks
- Wall Sits: single-leg, calf-raise variation

Advanced/Gym movements discussed include barbell squat, deadlift, bench press, pull-ups, dumbbell lunges, kettlebell swings, rowing intervals, assault bike, box jumps and potentially sled pushes.

- Stock exercise library
- Movement variants
- RUF / standardised scoring abstraction
- Timed exercises
- Bodyweight mode
- Advanced/Gym mode
- Weighted entries
- Custom exercises
- Group-approved exercise set
- Exercise favourites and recents
- Consistent professional demonstration videos
- Beginner modifications
- Advanced variations
- Custom demo upload
- Community library - future
- Combos - future
- Exercise Roulette - experimental
- Fatigue-aware suggestions - experimental
- Weather-based alternatives - experimental

Video direction: standard demos should look visually consistent - ideally one professionally licensed exercise library, or at most two closely matched libraries, rather than a patchwork of unrelated clips.

RUF conflict: earlier architecture uses RUF (Reps With Friends Units) as the internal universal score. Latest product language says adjusted reps. Recommended interim interpretation: RUF remains the internal conversion/scoring abstraction while the player-facing UI generally says reps. This is still unresolved.

3.4 Rep capture

- One-touch logging
- Numeric logging
- Batch sets
- Preset amounts
- Favourite exercises
- Recent exercises
- Timed exercise logging
- Voice commands
- Siri / assistant integration
- Lock-screen widget
- Home-screen widget
- Apple Watch
- Wear OS
- Motion counting
- Camera-assisted counting
- Location-aware gym prompt
- Calendar-aware suggestions
- Offline-first queue
- Duplicate/error handling

3.5 Realtime and social engine

- Realtime rep updates
- Progress rings
- Player presence
- Pulsing avatars
- X friends active now
- Feed events
- Leaderboard moves
- Micro-animations
- Big-set glory moments
- Group momentum
- Group rep/activity summary
- Quick reactions
- Friendly heckles
- FOMO alerts
- Peer encouragement
- Live challenge invitations
- Join-live workout concept
- Rep Races
- Synchronized exercise moments

3.6 Power-Ups

Lightning Round: Next 10 minutes, activating player's reps count triple.

Rep Steal: Activator receives 10% equivalent of another player's current completed score; target keeps theirs.

Group Shield: Protects the group from an agreed daily failure consequence; exact protection is still unclear under the latest season model.

Time Freeze: Adds/pauses 30 minutes on the battle clock; stacking and timing rules remain open.

Agreed post-launch

Combo Boost: Bonus for completing a prescribed exercise combination.

Double Down: Volunteer for 2x target and 2x reward if successful.

Assist Boost: Reward player and teammate when one helps another finish.

Surprise Bomb: Assign another player +20 reps to complete in the next 10 minutes.

Rescue Rope: Give an inactive teammate an instant 50-rep credit, limited.

Shield Bash: Cancel an active shield; Pro/competitive mode.

Experimental / preserved brainstorm

- Team Shield
- Partner Boost
- Power Hour / Thunder Hour
- Chain Reaction
- Group Sync Bonus
- Exercise Roulette
- Rep Storm
- Combo Multiplier
- Random Daily Bonus
- Revenge Mode following certain shield outcomes
- Wager Boost - legacy/future
- Rare/Epic/Legendary rarity layer

3.7 Seasons and stakes

Current canonical Stake object needs: season, participants, stake type, declaration, value, agreement state, result, winner, responsible loser(s), fulfilment state and evidence where applicable.

Dinner: Loser shouts the agreed meal.

Dare: Pre-agreed forfeit; cannot be negotiated after losing.

Deliverable: Pre-agreed favour/service.

Charity Pot: Participants contribute money; winner directs eligible donation; platform fee disclosed.

Deferred cash-betting concepts preserved for a separately scoped future module: winner-takes-all cash pot, last-place pays, escalating monetary penalties, side bets, Double Down money stakes, skip-day insurance, Charity Bomb variants, public pledge, and crypto/blockchain wagers. These are not current launch scope.

3.8 Charity

- Choose eligible charity
- Nominate charity subject to approval
- Group contribution
- Company matching
- Platform fee disclosure
- Donation receipt
- Impact card
- Corporate PR/social share
- Charity season history

Legal/payment treatment remains missing and must be separately reviewed before production.

3.9 Integrity and anti-cheat

- Trust score
- Spot checks
- Optional Rep Cam proof
- AI pose/form analysis
- Peer flagging
- Pattern analysis
- Large-set plausibility checks
- Verified leaderboard
- Hardcore/Verified mode
- Honor Mode
- Friends-mode playful consequences
- Corporate-safe private review
- Limits on abusive peer flags

Earlier Shame Bell / public cheat-callout ideas should be friends-mode opt-in only, not corporate defaults.

3.10 Social, UGC and sharing

- Winner cards
- Season cards
- Close-call cards
- Stats cards
- Join the Battle invite
- Group QR
- Reactions
- Taunts
- Hype Clips
- Taunt Mode
- Rep Cam
- External clip upload
- Caught Repping
- Clutch Capture
- Automatic daily highlight reel
- Branded overlays
- Public challenges
- Reunion events

- Invite dormant friend
- Referral rewards

3.11 Chat-platform features

- Create group from chat
- Opt in from chat
- Lightweight user profile
- Account linking
- Rep logging
- Leaderboard query
- Battle status
- Power-up activity
- Milestone updates
- Winner posts
- Season updates
- Challenge actions
- Deep links into app
- Chat notification intensity
- Platform-specific command syntax

Platform feasibility differs materially and must not be assumed uniform across WhatsApp, Slack, Messenger, Discord and Teams.

3.12 Notifications

Battle state:

- Battle starts
- Final 3 hours
- Final 1 hour
- Final 30 minutes
- Final 10 minutes
- Do-or-die final push
- Close-call
- Target completed

Social:

- Friend logged reps
- Several friends active
- Competitor passed you
- Group momentum
- New PR
- Teammate needs help

Power-Ups:

- Power-up activated
- Power-up targeted at you
- Shield
- Freeze
- Surprise Bomb

Seasons:

- Standings changed
- Final day
- Season winner
- Stake due
- Charity result

Re-engagement:

- Streak risk
- Comeback Quest

- Old-group reunion
- Friend invitation

Notification principle: create motivation, not spam.

3.13 Behavioural retention mechanics

- Daily reset
- First-to-target urgency
- Streaks
- Loss aversion
- Micro-commitments
- Progressive overload
- Rest days
- Comeback Quests
- Future casting
- Sunk-cost display
- Reputation
- Social proof
- Accountability partner
- Mentor mode
- Active-groups-now counter
- Season narrative
- Loot
- Achievements
- Ranks/prestige
- Seasonal campaigns
- Territory control - experimental
- Easter eggs
- Exercise trading cards - experimental

3.14 Analytics

Strong/current candidates

- Daily Wins
- Completions
- Streak
- Lifetime reps
- Season wins
- Win rate
- Average finish time
- Personal records
- Exercise diversity
- Active days completed
- Group participation
- Team contribution
- Pace predictor
- Projected finish
- Momentum

Advanced ideas

- Weak-link alert
- Peak activity time
- Social impact score
- Who motivates whom
- Social graph
- Group chemistry

- City rankings
- Global rankings
- Corporate engagement

High-risk/unvalidated health claims

Earlier brainstorms included body-transformation estimation, years-added-to-life claims and predictive physical outcomes. These should not ship without credible methodology and legal/medical review.

3.15 Progression and meta-game

- Streak badges
- Daily winner badges
- Weekly champion
- Major season champion
- Exercise personal records
- Achievement hunting
- Lifetime rep milestones
- Ranks
- Prestige
- Seasonal campaign rewards
- Collectible power-ups
- Rare cards
- Group trophies

3.16 Monetisation

Subscriptions: Free, Pro and Corporate/Teams tiers; annual and limited lifetime/founder concepts. Earlier \$9.99 Pro and \$29.99+ Teams figures are placeholders, not locked.

Platform fee: Small disclosed fee on Charity Pot if legally/permissibly structured.

In-app purchases: Potential power-up packs, cosmetics, skins and seasonal content; must avoid destructive pay-to-win incentives.

B2B: Corporate wellness, leagues, reporting, branding and company challenges.

Brand/sponsorship: Sponsored challenges, creator seasons, branded Power Hours and equipment partnerships.

Physical: Reps Kits, merch and gear drops.

No ads: Traditional display advertising is not intended as a core monetisation pillar.

3.17 Physical Reps Kits

Starter / Home Hero: Skipping rope, resistance bands, unlock card and stickers/brand extras.

Pro / Battle Pack: Premium rope, multiple band strengths, door anchor, possible wearable/NFC concept and Pro/exclusive unlocks.

Team / Corporate: Multiple kits, leaderboard poster, onboarding instructions and company branding.

3.18 Experimental smart features preserved from brainstorms

- Fatigue intelligence
- Weather-based exercise suggestions
- Location learning
- Calendar-sensitive targets
- Bio-rhythm optimisation
- Automatic motion detection
- AI form coach
- Globally active group count
- Territory ownership
- City-versus-city
- Celebrity challenges
- Crypto integration

- P2P syncing
- Exercise trading cards
- Hidden Easter-egg exercises

4. User flows

4.1 New user -> creates Individual group

1. Install/open app
2. Welcome
3. Sign up
4. Create profile
5. Set timezone/quiet hours
6. Basic fitness baseline
7. Tap Create Group
8. Select Individual Mode
9. Name group
10. Invite members
11. Choose active days
12. Confirm daily target (working 200)
13. Configure handicap
14. Choose exercise mode/library
15. Choose Weekly/Monthly season
16. Choose stake type
17. Configure power-ups
18. Choose/shared battle clock
19. Optionally link messaging platform
20. Review
21. Create
22. Share invite
23. Members join and agree
24. Season starts

4.2 New user -> joins existing group

25. Receive deep link/QR/code
26. Preview group
27. Register/login if needed
28. See mode
29. See days
30. See target
31. See handicap approach
32. See exercises
33. See stake
34. Explicitly accept
35. Pay charity contribution if required
36. Join roster
37. Battle appears on Home

4.3 Chat-first join

38. Existing WhatsApp/Slack/etc. receives Reps integration
39. User taps Join/Opt In
40. System identifies whether account exists
41. Existing user links account OR new user creates lightweight/fast profile
42. User accepts battle rules
43. User joins
44. Chat posts confirmation
45. Hero app remains available for deeper controls

Unresolved: temporary profile versus mandatory immediate full account.

4.4 Daily Individual Battle

46. Battle start alert
47. Open Battle
48. See adjusted target
49. See competitors
50. Log exercise set
51. Server applies exercise conversion plus handicap
52. Progress updates
53. Feed notifies group
54. Users react/taunt
55. Power-ups may alter race
56. First eligible player reaches target
57. Daily Winner generated
58. Battle continues for others
59. Later completers bank day/streak
60. Deadline ends
61. Incomplete users record failed day
62. Battle recap generated
63. Daily Win adds to season standings

4.5 Team Battle

64. Group split into 2+ teams
65. Each user still sees personal target
66. Rep logs update individual completion
67. Same activity updates team score
68. Team progress shown beside rivals
69. Minimum contribution rules apply
70. Team reaches configured win condition
71. Team earns Daily Win
72. Individual completions still preserve streaks
73. Team Daily Win adds to season

Unresolved: pooled adjusted reps versus average completion versus another normalisation method.

4.6 Corporate Battle

74. Admin creates organisation
75. Employees invited/imported
76. Departments/teams configured
77. Admin chooses active days
78. Corporate-safe settings applied
79. Optional charity stake configured
80. Employees join
81. Daily user experience mirrors Team Mode
82. Department/company result feeds season
83. Admin receives aggregate reporting
84. Season ends
85. Charity/recognition outcome executes

4.7 Handicap calibration

86. User joins group
87. System gathers baseline inputs
88. Starting multiplier calculated
89. User sees plain-language explanation
90. Multiplier used in adjusted score
91. Historical performance collected
92. Periodic recalibration proposed
93. New multiplier applies under defined season-boundary rules

Starting formula, recalibration trigger and season-boundary behaviour remain unclear.

4.8 Log reps

- 94. Tap central + / Log Reps
- 95. Recent/favourite exercises appear
- 96. Select exercise
- 97. Enter reps/time/weight
- 98. Preview adjusted value if appropriate
- 99. Submit
- 100. Local optimistic update
- 101. Backend verifies
- 102. Realtime update broadcasts
- 103. Feed event created
- 104. Active power-up multiplier applied
- 105. User sees remaining target
- 106. Undo available briefly

4.9 Lightning Round

- 107. Open Power-Ups
- 108. Select Lightning Round
- 109. Confirm
- 110. 10-minute timer starts
- 111. Group receives activation event
- 112. User logs reps during window
- 113. Eligible reps score at x3
- 114. Timer expires
- 115. Feed records bonus impact

4.10 Rep Steal

- 116. Select Rep Steal
- 117. Choose eligible competitor
- 118. App displays expected value
- 119. Confirm
- 120. User gains 10% equivalent
- 121. Target retains score
- 122. Leaderboard updates
- 123. Group receives social event

4.11 Group Shield

- 124. Activate card
- 125. Group notified
- 126. Shield state displayed
- 127. End-of-day system applies defined protection
- 128. Shield consumed
- 129. Optional Revenge Mode may trigger next day if retained

This flow contains unresolved rule/legal details listed in Section 5.

4.12 Time Freeze

- 130. Player activates
- 131. Battle clock visually freezes
- 132. Deadline extends/pauses 30 minutes
- 133. All connected clients update
- 134. Notifications reschedule
- 135. Freeze ends
- 136. Battle continues

This flow contains unresolved rule/legal details listed in Section 5.

4.13 Weekly Season + Dinner stake

- 137. Create weekly season
- 138. Dinner terms agreed in advance
- 139. Daily battles occur
- 140. Daily Wins accrue
- 141. Final active day finishes
- 142. Season standings lock
- 143. Winner/loser determined
- 144. App displays obligation
- 145. Optional fulfilment proof
- 146. Season archived
- 147. Next weekly season begins

4.14 Dare stake

- 148. Dare written before season
- 149. Participants accept
- 150. Daily battles and season resolve
- 151. Losing party receives due dare
- 152. Optional proof upload
- 153. Winner/others may mark fulfilled

4.15 Charity Pot

- 154. Group selects Charity Pot
- 155. Contribution and platform fee shown
- 156. Participants agree/pay
- 157. Pot locks under defined rule
- 158. Season plays
- 159. Winner determined
- 160. Winner selects approved charity
- 161. Donation processed
- 162. Receipt/confirmation generated
- 163. Group sees impact
- 164. Optional share card created

This flow contains unresolved rule/legal details listed in Section 5.

4.16 Season finale

- 165. Final day identified
- 166. Standings show implications
- 167. Notifications increase
- 168. Daily battle occurs
- 169. Daily Win locks
- 170. Season score resolves
- 171. Full Season Winner animation
- 172. Stake result displayed
- 173. Season recap generated
- 174. Next season proposed

4.17 Share a win

- 175. Winner screen
- 176. Tap Share
- 177. Preview branded card
- 178. Choose Story/WhatsApp/Messenger/link/etc.
- 179. Shared content includes brand and optional invite
- 180. Referral attribution captured if possible

4.18 Hype Clip / Caught Repping - future

- 181. Record/import clip
- 182. Select battle/event
- 183. Tag participant
- 184. Obtain needed consent
- 185. Apply branded overlay
- 186. Share to group
- 187. Optionally share externally
- 188. Report/moderation tools available

4.19 Proof challenge - future

- 189. System/random/peer flag triggers proof
- 190. User receives short verification request
- 191. User records/uploads clip
- 192. AI/admin/group rule evaluates
- 193. Pass -> trust increases
- 194. Fail/decline -> configured consequence
- 195. Corporate flow remains private

4.20 Bring Back a Mate

- 196. System detects dormant teammate/group
- 197. Prompts existing user
- 198. User shares one-tap invite
- 199. Dormant friend joins
- 200. New battle/season created
- 201. Return reward may be issued

4.21 Gym group

- 202. Admin selects Gym/Mixed Mode
- 203. Enables advanced library
- 204. Defines accepted conversion rules
- 205. Members log weight/ reps
- 206. System converts to competitive score
- 207. Handicap applies
- 208. Battle UX remains identical

4.22 Chat-based rep logging - future

- 209. User types supported chat command
- 210. Integration authenticates sender
- 211. Parses exercise/reps
- 212. Backend validates group/battle
- 213. Log created
- 214. Chat bot replies with remaining target
- 215. Hero app updates in realtime

5. Gaps

The items below are deliberately surfaced rather than silently filled. They are requirements a complete product must resolve or explicitly defer.

UNCLEAR - Team scoring

Latest stakes architecture says team reps pool to a team total, while uneven teams such as 3v2 are allowed. Raw pooled totals advantage larger teams. Final rule must be average completion, total normalised score, best N members, team quota, or another method.

UNCLEAR - Exact handicap algorithm

Need starting inputs, baseline test, formula, min/max, recalibration frequency, effective date, anti-sandbagging, fast-improvement handling and admin override.

UNCLEAR - RUF vs adjusted reps

Earlier architecture uses RUF as the common scoring unit; latest language uses adjusted reps. One canonical model is required.

UNCLEAR - Exact Group Shield behaviour

Latest architecture separates Daily Win, completion, streak, season and stake. Must define which of those Shield protects.

UNCLEAR - Time Freeze rules

Need beneficiary, stacking, maximum freezes, use after winner, effect on notifications and next battle.

UNCLEAR - Rep Steal rules

Need cap, rounding, timing, target eligibility, whether it can trigger a win, Team/Corporate availability and daily limit.

UNCLEAR - Season ties

Need tiebreaker or playoff policy.

UNCLEAR - Several missed days

Need simple loss/deficit/elimination/comeback/season eligibility rules.

UNCLEAR - Major Season concurrency

Can Weekly and Major Season run simultaneously in V1?

UNCLEAR - Daily Win point weighting

Clean default is 1 Daily Win = 1 season point. Late-season weighting was discussed but not decided.

MISSING - Final 15-20 default exercises

Twelve are well established; the remaining launch movements need explicit approval.

MISSING - Numerical exercise conversion table

No complete final RUF/adjusted-rep values exist.

MISSING - Weighted exercise formula

Need exact relationship between load and competition value.

MISSING - Exercise safety copy

Need proper guidance and disclaimers.

UNCLEAR - Custom exercise governance

Who assigns competitive value: member, group admin, or an app recommendation engine?

MISSING - Charity payment/fundraising architecture

Requires legal and payment design.

MISSING - Eligible charity source

Need partner/API, approved list or nomination verification.

MISSING - Platform fee rate

Fee must be clearly disclosed but is not set.

MISSING - Contribution refund rules

Need handling for player exits, cancelled season, unavailable charity and technical failure.

MISSING - Dare safety policy

Need prohibited dare categories.

MISSING - Dinner/deliverable enforcement

Need to decide whether app merely records or formally tracks fulfilment.

UNCLEAR - First messaging platform

A first messaging integration is strategically important but has not been chosen.

MISSING - Platform capability audit

WhatsApp, Slack, Messenger, Discord and Teams expose materially different APIs and permissions.

UNCLEAR - Chat-only user identity

Need lightweight temporary account versus mandatory fast account creation.

MISSING - Chat permission/consent

Need explicit opt-in before the integration posts frequently inside an existing group.

MISSING - Video retention

Define retention period and deletion.

MISSING - Video privacy

Define group/public defaults.

MISSING - Consent

Define recorded-person approval for Caught Repping.

MISSING - Video moderation

Reporting/review workflow.

MISSING - Proof appeals

Handling false negatives and disputes.

MISSING - Workplace recording

Corporate video restrictions.

MISSING - Under-18 video safety

Need age-specific policy if minors are permitted.

MISSING - Corporate buyer/admin model

Exact buyer and permission levels.

MISSING - Corporate data visibility

Individual versus aggregate data.

MISSING - Employee opt-in/privacy

Need explicit governance.

MISSING - Company-v-company governance

Cross-company rules.

MISSING - Enterprise pricing

Not defined.

MISSING - SSO

Not yet specified.

MISSING - Employee offboarding/team transfer

Lifecycle rules.

MISSING - Charity matching

Company matching mechanic/rules.

MISSING - Free entitlement

Exact launch limits.

MISSING - Pro entitlement

Exact launch unlocks.

MISSING - Corporate entitlement

Exact enterprise feature matrix.

MISSING - Pricing

No final price.

MISSING - Annual/lifetime offers

Discount and lifetime founder rules not final.

MISSING - Power-up monetisation

Need earn versus buy balance and pay-to-win limits.

MISSING - Charity season access

Need Free/Pro rule.

MISSING - Notification rate limits

Critical versus optional frequency.

MISSING - Default intensity

Standard versus high-intensity modes.

MISSING - Quiet-hours behaviour

Rules for urgent moments.

MISSING - Push versus chat duplication

Avoid double-notifying.

MISSING - Corporate defaults

Need lower-noise policy.

MISSING - International scheduling

Local-time delivery rules.

UNCLEAR - Default battle-clock mode

Need final Shared Clock versus Adaptive Global default and rollout.

MISSING - Travel mid-battle

Timezone changes without exploiting reset.

MISSING - DST transitions

Edge-case scheduling.

MISSING - Global season day boundary

Define common worldwide day.

MISSING - Corporate regional seasons

Need regional/global season rules.

MISSING - Community standards

Behaviour rules.

MISSING - Abuse reporting

Reporting workflow.

MISSING - Blocked users

Safety and group interaction.

MISSING - Harassment policy

Enforcement.

MISSING - Moderation appeals

Process.

MISSING - Dangerous custom exercises

Prohibited movement policy.

MISSING - Dare restrictions

Safety categories.

MISSING - Baseline onboarding questions

Exact fitness-assessment inputs.

MISSING - Calibration timing

Before group versus after joining.

MISSING - Skip calibration

Whether user can bypass.

MISSING - Handicap privacy

Whether other members see multiplier.

MISSING - Handicap dispute

What if player rejects assigned handicap.

MISSING - No groups

Empty state.

MISSING - No season

Empty state.

MISSING - No power-ups

Empty state.

MISSING - No history

Empty state.

MISSING - No feed

Empty state.

MISSING - Expired invite

Error state.

MISSING - Offline/sync error

Recovery state.

MISSING - Failed charity contribution

Payment error.

MISSING - Denied permissions

Permission-specific fallback.

MISSING - Invalid exercise

Validation.

MISSING - Revoked integration

Reconnect flow.

MISSING - Season cancelled

Cancellation flow.

MISSING - Data deletion/export

Privacy rights.

MISSING - Device session management

Security.

MISSING - Profile visibility

Privacy.

MISSING - Minimum age for non-money gameplay

Policy.

MISSING - Geographic rollout

Launch markets.

MISSING - Data retention schedule

Logs and media.

5.15 Technical and visual conflicts

Auth conflict: AWS Cognito appears repeatedly, but an earlier comment questioned whether authentication had been chosen differently. Working direction is Cognito unless deliberately changed.

Database conflict: earlier ideas included Firebase, Supabase, DynamoDB and RDS. Later architecture converged on NestJS + Postgres + Redis + AWS. Treat Postgres/Redis/AWS as current working direction, not immutable.

Realtime conflict: imported brainstorm mentioned P2P sync and sub-100ms updates; current direction is central WebSockets/Redis. P2P should be treated as legacy brainstorm.

Visual conflict: current latest black/gold/yellow with purple accent versus earlier cream-led Dark/Yellow/Cream palette versus older lime/lavender artifact. Final design-system lock is required.

Legacy power-up conflict: earlier visual artifacts contained Turbo Boost, Rep Shield and Streak Freeze. Current canon is Lightning Round, Rep Steal, Group Shield and Time Freeze. Old names should not become production requirements accidentally.

6. Open questions

Priority A - Core mechanics

- 216. Is the internal scoring term officially RUF, adjusted reps, or both?
- 217. What exactly is the handicap formula?
- 218. How is a starting handicap assigned?
- 219. How often does it recalibrate?
- 220. Can handicap change during a season, or only between seasons?
- 221. What are the min/max handicap multipliers?
- 222. Is 200 officially the default daily target or only the current test baseline?
- 223. Are all normal Daily Wins worth exactly one season point?
- 224. How are season ties resolved?
- 225. What happens if somebody misses multiple active days?
- 226. Can a new player join mid-season?
- 227. Can somebody leave mid-season?
- 228. Can Weekly + Major Season run simultaneously in V1?
- 229. How is Team Mode scored, especially 3v2?
- 230. What is the minimum individual contribution in Team Mode?
- 231. What exact condition creates a Team Daily Win?

Priority B - Power-Up rules

- 232. Exactly what does Group Shield protect now that Daily Win, streak and season are separate?
- 233. Does Time Freeze affect the whole group or only the activating player?
- 234. Can Time Freeze be used after somebody has already won the day?
- 235. How many Time Freezes can stack?
- 236. What is the Rep Steal cap?
- 237. Can Rep Steal itself trigger a Daily Win?
- 238. Are power-ups available in Charity seasons?
- 239. Which power-ups are disabled in Corporate Mode?
- 240. Do players earn, buy or randomly receive power-ups - or all three?
- 241. How many cards can a player hold?
- 242. Do power-ups expire?
- 243. Is rarity a real game mechanic or only visual collecting?
- 244. Does Double Down affect Daily Win eligibility or only secondary rewards?

Priority C - Exercises

- 245. What are the final 15-20 launch exercises?
- 246. What is each movement's exact conversion value?
- 247. Is Gym Mode in launch or post-launch?
- 248. How does load affect weighted exercise value?
- 249. Who approves custom exercise scoring?
- 250. Can a group completely replace the stock exercise list?
- 251. Are custom exercise videos allowed from day one?
- 252. Which licensed demo provider/library will be used?

Priority D - Seasons and stakes

- 253. What is the default Weekly Season structure if a group only plays three agreed days?
- 254. Does loser mean lowest Daily Wins, lowest completion, or another metric for Dinner/Dare/Deliverable?
- 255. What happens if two players tie for last?
- 256. Can more than one person owe the stake?
- 257. What contribution amount does Charity Pot default to?
- 258. What platform fee is taken?
- 259. Which charities are eligible?
- 260. Can a winner nominate any registered charity?
- 261. Who is legally the donor for receipt/tax purposes?
- 262. What happens if a Charity season is cancelled?

Priority E - Dual-surface / chat

- 263. Which messaging platform should be built first?
- 264. Must users install the hero app before playing through chat?
- 265. Can a chat user log reps before creating a full account?
- 266. Which chat actions are essential V1: notifications only, or true two-way logging?
- 267. Should group creation be possible entirely inside chat from day one?
- 268. How noisy can the integration be?
- 269. Should there be Quiet / Standard / Chaos chat notification modes?

Priority F - Brand / UI

- 270. Is the latest black/gold design officially the master visual source of truth?
- 271. Does cream remain part of the primary app interface or only supporting surfaces?
- 272. Is purple an official secondary accent?
- 273. What exact final logo lockup is approved?
- 274. Do we keep the hero image/photo treatment used on the latest Battle home?
- 275. How far do winner animations go before the product feels too casino-like?

Priority G - Monetisation

- 276. What is Free at launch?
- 277. What is Pro?
- 278. Are multiple groups Pro-only?
- 279. Are premium power-ups purchasable or earn-only?
- 280. Do we want power-up IAP at all given pay-to-win risk?
- 281. What does Corporate pricing look like?
- 282. Is a lifetime founder plan still desired?
- 283. Does Charity Pot require Pro?

Priority H - Integrity / social safety

- 284. How strict should proof be in normal friends groups?
- 285. Does a peer flag freeze reps immediately or only create review?
- 286. What is the consequence of proven cheating?
- 287. Does a fun public penalty require group opt-in?
- 288. What content can be shared publicly?
- 289. What is the consent process for Caught Repping?
- 290. Are under-18 users permitted in non-stakes groups?
- 291. Do corporate users ever see individual integrity scores?

Priority I - Technical / platform

- 292. Is Flutter definitely locked?
- 293. Is NestJS definitely locked?
- 294. Is Postgres + Redis the intended backend persistence/realtime architecture?
- 295. Is Cognito the auth provider, or should another earlier option be reinstated?
- 296. What is the AWS region strategy?
- 297. Do we need web at launch, or mobile only plus corporate/admin web later?
- 298. What are the launch countries?
- 299. Which external APIs are approved for charity/payment/chat integration?

7. Canonical decisions already strong enough not to re-open casually

- Reps With Friends name.
- Join the Battle. Win the Day.
- Social game first; workout tracker second.

- Standalone hero app plus messaging integrations.
- Hero app is source of truth.
- Individual / Team / Corporate modes.
- Minimum two players per Team.
- Corporate supports internal and company-v-company competition.
- Agreed active days; users are not required to play every day.
- Handicap is central to fairness.
- First to adjusted target earns Daily Win.
- Completing target still banks the day even after a winner exists.
- Daily Wins feed seasons.
- Weekly Season is default.
- Monthly and Major Seasons exist conceptually.
- Stakes resolve at season level rather than daily.
- Dinner / Dare / Deliverable / Charity Pot are the current stake types.
- Charity Pot is the preferred initial money-related mechanic.
- Player-to-player cash betting is deferred.
- Four launch Power-Up concepts: Lightning Round, Rep Steal, Group Shield, Time Freeze.
- Professional consistent exercise demonstration video is desirable.
- Approximately 15-20 stock exercises plus custom/advanced modes.
- Winner screen is a major dopamine/shareable moment.
- Anti-cheat needs both social and technical layers.
- Corporate mode must avoid public shaming.
- UGC/video is a significant future viral layer.
- Physical Reps Kits are an intended expansion path.
- No traditional display-ad-driven product experience.
- AI-assisted product/design/development is central to the build strategy.

8. Source and maintenance notes

This document consolidates the full Reps With Friends project discussion and the product artifacts referenced in the project. The messaging-platform concept strongly reinforces the standalone-app-plus-chat-layer architecture. Older battle/UI artifacts are retained as evidence of information architecture but not necessarily final visual or mechanic decisions.

Maintenance rule: add new product decisions here rather than creating a parallel master document. When a decision changes, preserve the old rule under a dated Superseded note so the product history remains traceable.
